What is Google Analytics?

Google Analytics is a cloud-based analytics tool that measures and reports website traffic. It is the most widely used web analytics service on the Internet.

Why should we all use it?

Google Analytics helps you analyze visitor traffic and paint a complete picture of your audience and their needs. It gives **actionable insights** into how visitors find and use your site, and how to keep them coming back. In a nutshell, Google Analytics provides information about:

- What kind of traffic does your website generate – number of sessions, users and new users
- How your users interact with your website & how engaged they are – pages per session, average time spent on the website, bounce rate, how many people click on a specific link, watch a video, time spent on the webpage
- What are the most and least interesting pages – landing and exit pages, most and least visited pages
- Who visits your website – user's geo location (i.e. city, state, country), the language they speak, the browser they are using, the screen resolution of their device
- What users do once they are on your website – how long do users stay on the website, which page is causing users to leave most often, how many pages on average users view
- When users visit your website – date & time of their visits, you can see how the user found you.
- Whether visitors came to your website through a search engine (Google, Bing, Yahoo, etc.), social networks (Facebook, Twitter, etc.), a link from another website, or a direct type-in.

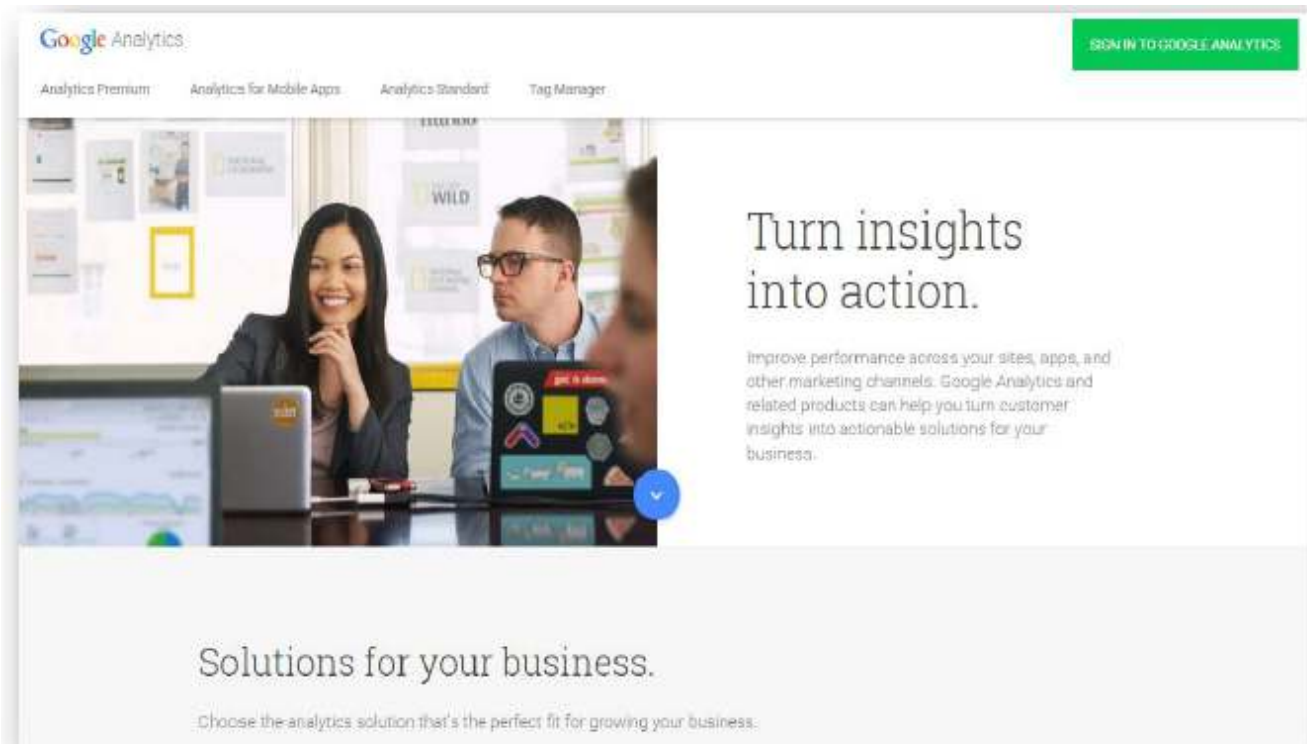

Ultimately, we can all use this data to get **actionable insights** and use them to take steps to improve our website and provide them with a great user experience.

What are the main Google Analytics features?

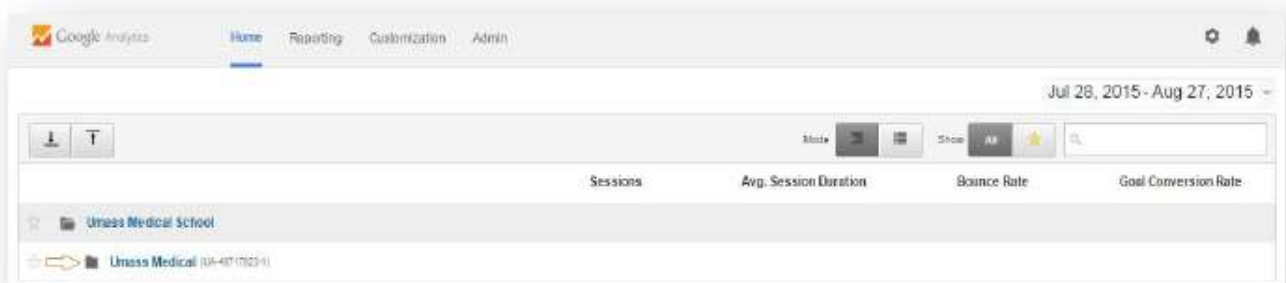

- Built-In reports, Dashboards and Real-time analytics
- Advanced: Custom reports, Cohort analysis, Goal-flow charts, custom dimensions & custom metrics

How to use Google Analytics?

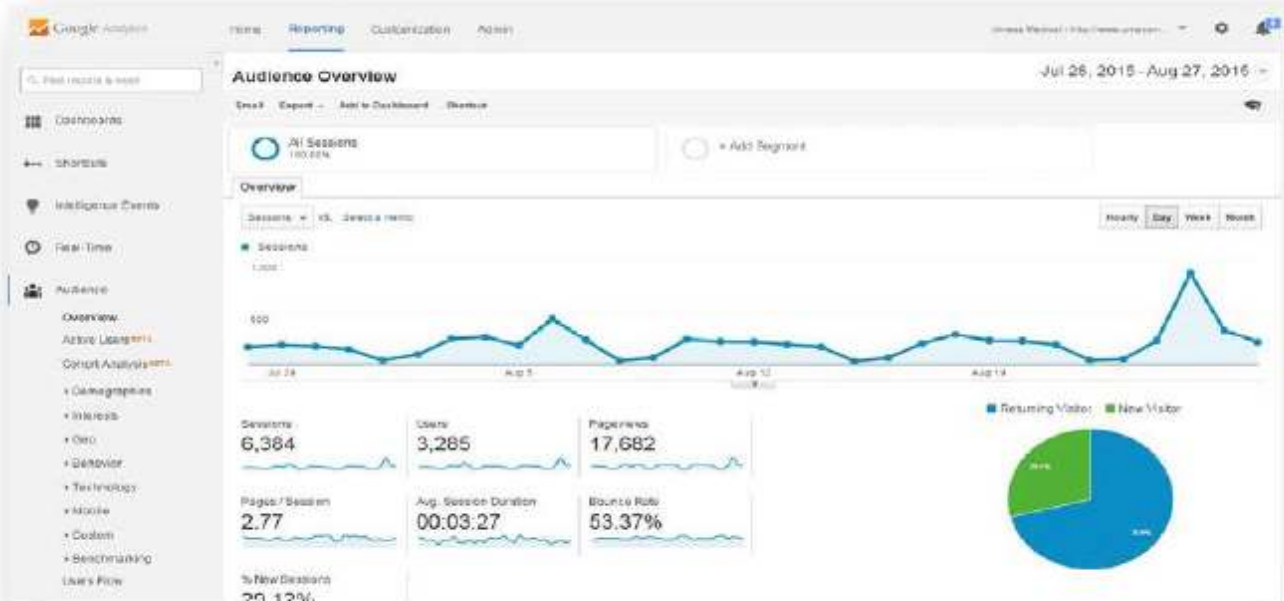

1. Create a Gmail account – to be able to use Google Analytics, you will need to have a Google account. Click [here](#) to create one
2. Once created the account, send me your newly created Gmail account to Stanislav.Prodanov@umassmed.edu and I will grant you access to Google analytics for your website.
3. You will receive an email from noreply-analytics@google.com with a subject line: ***You have been granted access to a property in Google Analytics account***
Follow the instructions in the email (i.e. click on the link provided in the email)
4. Sign in to Google Analytics (click on the green button on the top right corner)

5. You will see the main Google Analytics panel. Choose the account and the view corresponding to your website.

6. This is what you will see & this is how you will know that you have access to Google Analytics

7. **Add a bookmark** (press Ctrl+D at the same time). Save it in the bookmarks bar. In the name field write just “Google Analytics”. Then open another window in your browser, go to your bookmark bar and find the newly saved bookmark “Google Analytics”. Click on it and drag it so as to move it where you can see it (the next time you click on that book mark you will access Google Analytics).

Google Analytics Interface

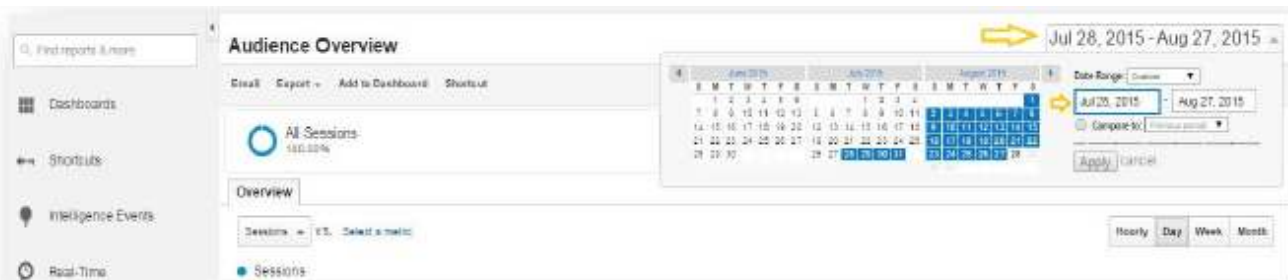

- (1) Dashboards & reports
- (2) Navigation – home, reporting, customization, admin
- (3) Time-period – here you will select the time period you want to analyze
- (4) Main view – where the reports and the data are presented

Date Range

The date range selector is at the top right of every page. By default, Google Analytics will show data for the past 30 days. To select a date range, click the arrow next to the existing date range to open the selector. Once you've selected a new date range, click Apply to update your report.

To use a predefined date range, select one of the following from the Date Range menu:

- Custom: Data for your custom date range.
- Today: Data available for the current calendar date up until the time of your selection
- Yesterday: Data for the previous calendar date
- Last Week: Data for Sunday through Saturday of the previous calendar week
- Last Month: Data for the first to last day of the previous calendar month

Dashboards

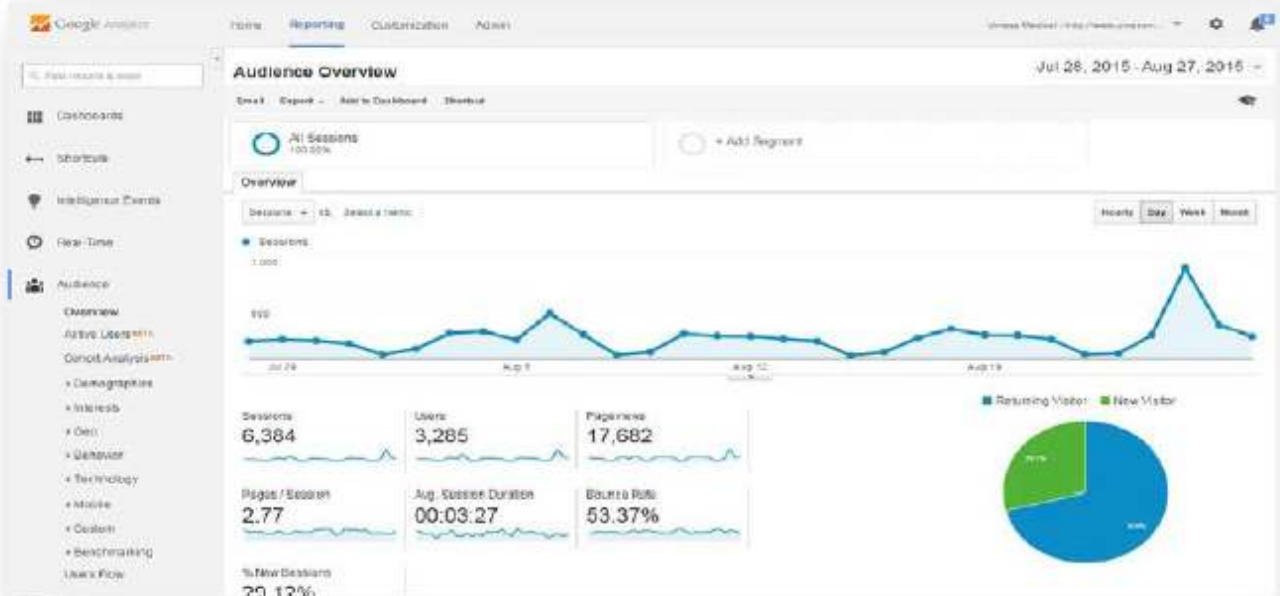

Dashboards are a collection of widgets that give you an overview of the reports and metrics you care about most. Dashboards let you monitor many metrics at once, so you can quickly check the health of your accounts or see correlations between different reports.

Audience Overview

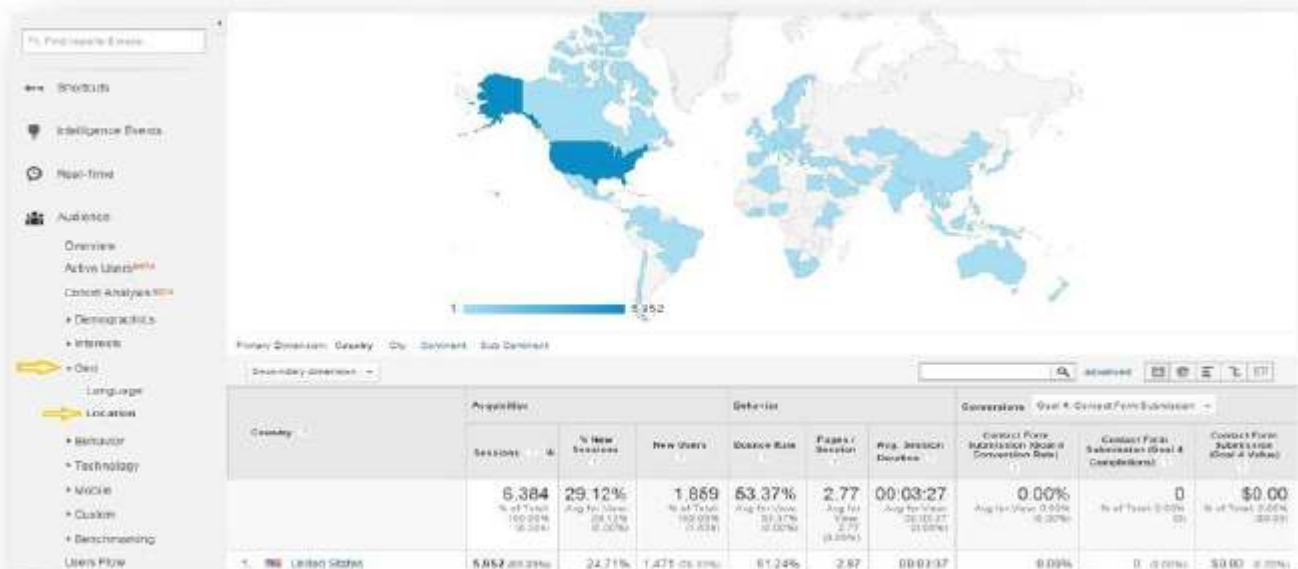

This report gives you a quick overview of the overall performance of the website – number of sessions, users (both new and returning), page views, average session duration, bounce rate, new sessions.

When you launch Google Analytics, you see the overview of the Audience report

a) Location

The location report provides information about the geographic location of your users (i.e. Country). To see the State and the City where your users come from, click on the interactive map.

b) New vs. Returning Users

This report provides information about the total number of visitor to your website and further breaks down that number into new vs returning users.

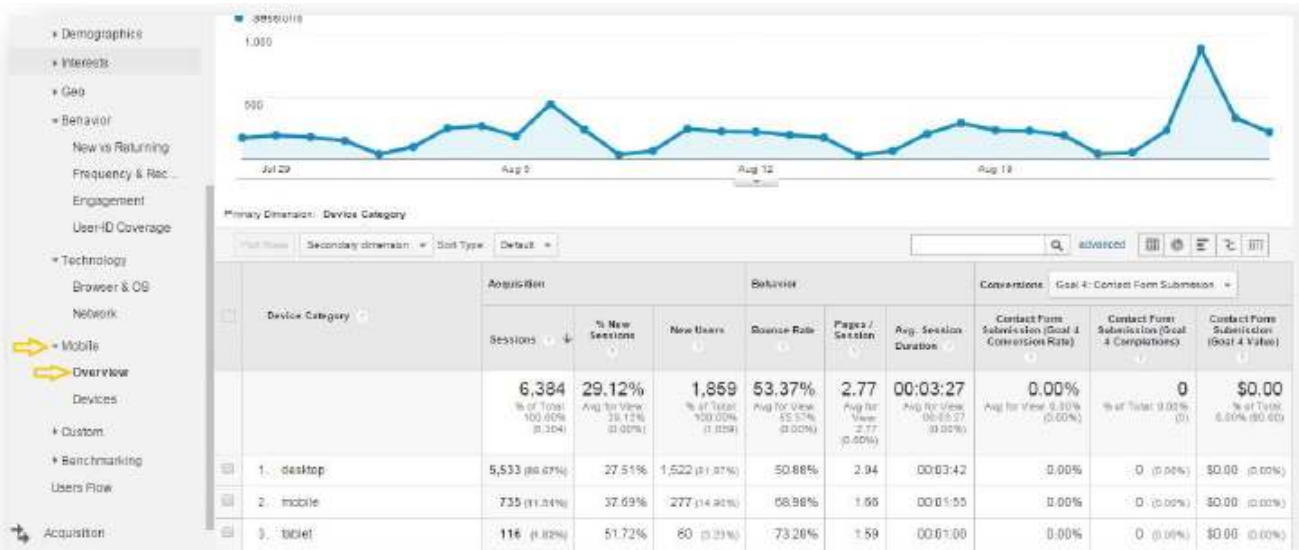

c) Browser & OS

This report provides information about what browsers people have used to access your website

d) Mobile Overview

This report provides information about the devices category people have used to access your website (desktop vs mobile vs tablet)

Acquisition Overview

This report gives you a quick overview of the top channels of your website traffic – direct traffic, organic search, referral, social media, display advertising, email and paid search (i.e. AdWords)

a) Source/Medium

This report provides information about both the source (i.e. the origin of your traffic, such as a search engine (for example, google) or a domain (example.com)) and the medium (i.e. the general category of the source, for example, organic search (organic), cost-per-click paid search (CPC), web referral (referral)) of the traffic data.

Source / Medium		Acquisition			Behavior			Conversions		
		Sessions	% New Sessions	New Users	Source Rate	Pages / Session	Avg. Session Duration	Contact Form Submission (Goal 4 Conversion Rate)	Contact Form Submission (Goal 4 Completions)	Contact Form Submission (Goal 4 Value)
		6,384	29.12%	1,859	53.37%	2.77	00:03:27	0.00%	0	\$0.00
		% of Total: 100.00% (6,384)	Avg for View: 29.12% (6,384)	% of Total: 100.00% (1,859)	Avg for View: 53.37% (6,384)	Avg for View: 2.77 (6,384)	Avg for View: 00:03:27 (6,384)	Avg for View: 0.00% (6,384)	% of Total: 0.00% (0)	% of Total: \$0.00 (\$0.00)
1.	google / organic	3,372 (52.82%)	32.21%	1,088 (58.42%)	56.01%	2.59	00:03:19	0.00%	0 (0.00%)	\$0.00 (0.00%)

c) AdWords, SEO & Social

This report provide information about your current and past AdWords campaigns, the performance of your website on search engine results (SEO) and traffic from social media websites.

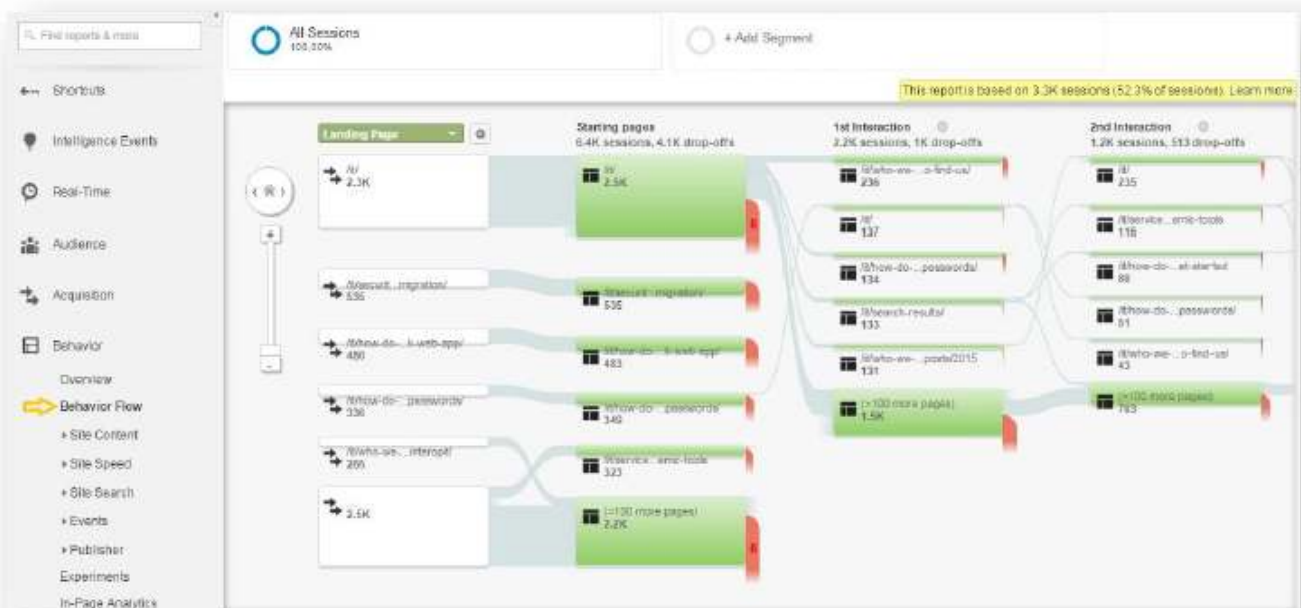

Behavior Overview

The Behavior overview report reveals what pages people visit on your website and what actions they take while visiting. It also provides information about the number of page views, bounce rate & exit rate

a) Behavior Flow

The Behavior Flow report visualizes the path users traveled from one page or Event to the next. This report can help you discover what content keeps users engaged with your site. The Behavior Flow report can also help identify potential content issues.

b) Site Content/All Pages

This report provides information about which are the most visited webpages of your website.

Primary Dimension: Page Page Title Other									
Secondary dimension: Sort Type: Default									
Page	Pageviews	Unique Pageviews	Avg. Time on Page	Entrances	Bounce Rate	% Exit	Page Value		
	17,682	12,566	00:01:57	6,384	53.37%	36.10%	\$0.00	% of Total	% of Total

10. /#/		132 (2.07%)	175 (0.99%)	75.43%

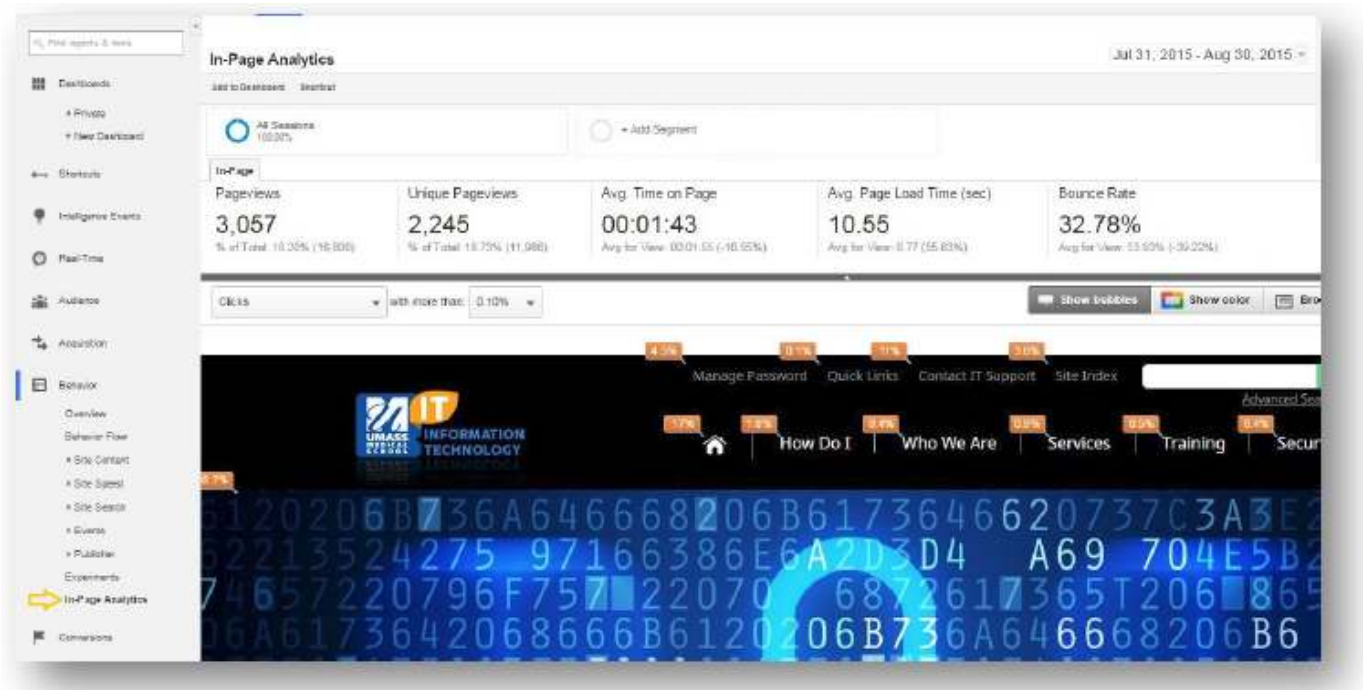

Real-Time

The Real-Time Report allows you to monitor activity as it happens on your website – e.g. how many people are on your site right now, which pages or events they're interacting with, and which goal conversions have occurred.

In-Page Analytics

The in-Page report allows you to see how customers interact with your web pages (i.e. what they click)

Google Analytics in EPiServer

Google Analytics gadget is integrated with our content management systems – EPiServer and provides users with direct access to their sites analytics through EPiServer with no need to log into a Google Analytics account.

Highlights of the dashboard gadget:

- Campaign performance, tracking visitors' interaction
- Acquisition metrics and demographics, behaviors on page, tracking of completed goals and events.

Toggle Navigation Panel → Settings → Add Gadgets → All → → Google Analytics

Google Analytics metrics to track regularly

- **Users** | Audience → Overview
- **New vs Returning Visitors** | Audience → Behavior → New vs Returning
- **Bounce Rate** | Audience → Overview
- **Landing Pages** | Behavior → Site Content → landing Pages
- **Exit Pages** | Behavior → Site Content → Exit Pages
- **Source/Medium** | Acquisition → All Traffic → Exit Pages
- **Average session duration** | Behavior → Site Content → All Pages
- **Page Views** | Behavior → Site Content → All Pages
