

SAP System Landscape

LESSON OVERVIEW

In this lesson, you will learn about the SAP's product portfolio, SAP Business Suite, SAP NetWeaver, SAP systems and instances. You will also identify the components of the SAP system landscape that SAP recommends.

Business Example

An SAP system administrator needs to understand the roles of different SAP systems in the SAP system landscape before deciding how to configure the Transport Management System.

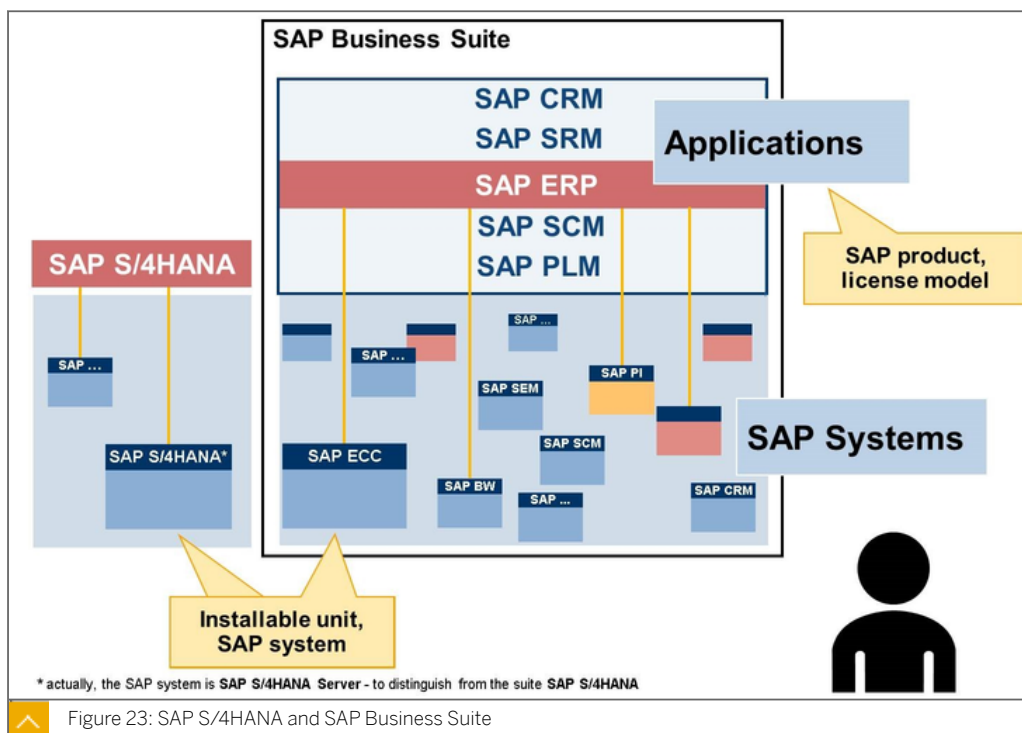

LESSON OBJECTIVES

After completing this lesson, you will be able to:

- Describe SAP systems

SAP System Components

The SAP Product Portfolio offers SAP applications for the following areas:

- Enterprise Resource Planning (SAP ERP)
