Create your free site

You asked, we answered!

Can I create a website in another language? ^

Absolutely. You can change your Site Language, which is the language your readers will experience at your site. You can also change the language you see while working on your site in the dashboard. The language you write on your website is up to you!

Will I have to pay for my custom domain? ^

Your free website includes a subdomain (sitename.wordpress.com). You can register a new custom domain or transfer an existing one to your free site, but you'll need a paid WordPress.com plan to use it as your site's main address. Without a plan, your custom domain will simply redirect visitors to your free subdomain.

Can I get an email account? ^

Email forwarding is included in a WordPress.com plan, and full email hosting is available through our partner G Suite.

Will I be able to sell online? ^

You can sell individual items on your site using your PayPal account. For more opportunities to monetize, upgrade to the [WordPress.com Premium plan](#) to sell products and services using the Simple Payment button. For more eCommerce features, like an online store, consider starting with a [WordPress.com Business plan](#).

Can I import content from another service? ^

It is possible to import your blog content from a variety of other blogging platforms, including Blogger, LiveJournal, Movable Type, Tumblr, Wix, Typepad, Xanga, and more. You can also import your content from a self-hosted WordPress site.
